REACH ARTICLE 33 COMMUNICATION

Regulation (EC) No 1907/2006, Article 33(1) and Article 33(2)

REACH Candidate List of SVHC reference date: 4 February 2026, 253 substances (per ECHA press release ECHA/NR/26/06).

To whom it may concern,

This communication is provided pursuant to Article 33 of Regulation (EC) No 1907/2006 (REACH), concerning the duty to communicate information on substances of very high concern (SVHC) in articles.

Article 33(1) Status (Communication to Recipients of Articles)

Part Number	Part Description	SVHC > 0.1% w/w	Communication Required
QRNG-USB-PRO-001	QuantaRNG-USB Pro	None	No

Based on supplier IPC-1752A declarations and Certificates of Conformance held on file by Dyber, Inc., and the published Diodes Master Certificate of Conformance, the QuantaRNG-USB Pro (including its aluminum 6061-T6 anodized enclosure from Protocase, Inc.) does not contain any substance from the REACH Candidate List of SVHC at a concentration above 0.1 percent weight by weight (w/w) of the article. Accordingly, no Article 33(1) communication of substance name(s) is required.

Standing Commitment under Article 33(1) and 33(2)

Notwithstanding the above, Dyber, Inc. acknowledges and accepts the following ongoing obligations:

- Article 33(1): If any SVHC is found to be present above 0.1 percent w/w of the article (or of a component-level article within the assembly under the ECHA "once an article, always an article" interpretation), Dyber, Inc. will provide the recipient, free of charge, with sufficient information available to allow safe use, including, as a minimum, the name of the substance.
- Article 33(2): On request from a consumer, Dyber, Inc. will provide the same information free of charge within 45 calendar days of receipt of the request.
- Dyber, Inc. monitors updates to the ECHA Candidate List of SVHC. The Candidate List is updated approximately twice per year (typically January and June). Each update is reviewed against the bill of materials within 60 days of publication, and a revised Article 33 communication is issued if any substance becomes reportable.
- SCIP database notifications under the Waste Framework Directive (Directive 2008/98/EC, Article 9(1)(i)) are submitted to ECHA where the SCIP threshold is triggered. As of the current declaration, no SCIP notification is required since no SVHC is present above 0.1 percent w/w.

Communication channel for SVHC inquiries:

- Email: compliance@dyber.com
- Mail: Dyber, Inc., 180 Admiral Cochrane Dr., Suite 212, Annapolis, MD 21401, USA
- Phone: +1 877-772-3927

Limitations. *Dyber, Inc. believes that the information it provides above is accurate. The provided information is based upon data obtained from ongoing due diligence concerning goods and materials provided by third party suppliers. Dyber, Inc. provides such information "AS IS", without any express or implied warranty of any kind. Dyber, Inc. reserves the right to update and modify this communication, as it believes necessary or appropriate.*

Please do not hesitate to ask for further information if needed.
